

RAVENS-WAY WILD JOURNEYS

FIELD BOTANY II: HOW TO FIND & IDENTIFY NATIVE PLANTS - HIGHLANDS

The Sky Islands of Southeastern Arizona are host to an incredible diversity of Native plants. Wildflowers, shrubs, trees, vines, and ferns grace our many habitats. Sadly, however, most people are able to identify only a few species. Here is your chance, then, to learn how to find and scientifically identify wild plants from the lowlands (e.g. Madrean Evergreen Woodland & Chaparral) in your area. Once you learn the basics of plant ID, then you can apply them to anywhere that you find yourself in Nature!

WHEN: **DECEMBER 16**

TUITION: **\$45**

WHERE: **SKY ISLANDS MOUNTAINS !**

Ethnobotanist, Naturalist, & Wildlife Biologist Vincent Pinto and his wife, Claudia, run RAVENS-WAY WILD JOURNEYS - dedicated to the Conservation and Protection of Nature, Wildlife, and the Environment through a wide variety of Eco-Friendly Programs and Adventures in the Sky Islands! Vincent has been teaching & raising awareness of Nature throughout the country since 1987.
